

Title: Safety Advisor

Location: McAllen, Texas

Job Overview

We are seeking a dedicated and knowledgeable Safety Advisor to join our team. The ideal candidate will have three to five years of experience in the construction field and have strong knowledge of high voltage electrical work. This position will be responsible for ensuring compliance with safety regulations and promoting a culture of safety within the organization.

This role will involve working closely with construction teams to identify risks, implement safety protocols, and ensure adherence to Occupational Safety and Health Administration (OSHA) standards. The Safety Specialist will play a crucial role in maintaining safe construction sites and managing environmental health and safety (EHS) initiatives.

Duties

- Conduct regular safety inspections and audits on construction sites to ensure compliance with OSHA regulations and company policies.
- Develop, implement, and maintain safety programs that promote a safe working environment for all employees.
- Provide training to employees on safety practices, emergency procedures, and the proper use of personal protective equipment (PPE).
- Collaborate with project managers to assess risks associated with construction activities and develop risk management strategies.
- Maintain records of incidents, accidents, and near misses; analyze data to identify trends and areas for improvement.
- Ensure compliance with workers' compensation regulations and assist in the management of claims.
- Stay updated on changes in safety regulations, industry standards, and best practices related to construction management.
- Utilize construction management software to track compliance metrics and report on safety performance.

Qualifications

- Bachelor's degree in Occupational Safety, Environmental Health, or a related field preferred.
- Proven experience in safety management within the construction industry is highly desirable.
- Knowledge of NEC (National Electrical Code) standards as they relate to safety practices is a plus.
- Familiarity with compliance management systems and risk management principles.
- Strong understanding of EHS regulations and OSHA standards applicable to construction sites.
- Excellent communication skills with the ability to effectively train staff at all levels.
- Proficiency in using construction management software for tracking compliance and reporting purposes.
- Ability to work collaboratively within a team environment while also being self-motivated.
- Transmission and substation work preferred.
- Bilingual (Spanish) preferred.

We invite qualified candidates who are passionate about promoting workplace safety in the construction industry to apply for this vital role.
